

February 2025

Kaeser Compressors NZ Proudly Sponsors Tylar Browne Racing in F2 Midget Racing

Kaeser Compressors NZ is proud to continue its sponsorship of Tylar Browne Racing (TBR) for a second year! One of New Zealand's rising F2 Midget racing stars, Tylar Browne continues to make his mark on the racing circuit with passion, perseverance, and dedication.

Now in his fourth competitive season, Browne has proven to be a formidable force on the track, currently sitting 5th in the 2024/25 season standings out of 25 competitors. Since debuting in the 2019/20 season, his journey has been marked by persistence and achievement. After overcoming a two-season hiatus due to injury, he returned with a vengeance in 2022/23, quickly making a name for himself with multiple podium finishes. His accolades include Best Presented Car awards, Most Improved Driver, and numerous top-three finishes in the fiercely contested F2 Midget class.

Off the track, Kaeser also supports Browne's workshop—Dracevich Panel Beaters—by supplying the reliable compressed air needed to keep operations running smoothly as Browne races towards victory. A Kaeser SK 22 series rotary screw compressor was recently installed to meet these requirements. Perfect for automotive workshops, the Kaeser SK 22 delivers efficient power transmission with a high-quality drive belt and automatic tensioning, ensuring reliable performance. Its easy-to-maintain design allows for quick, simple servicing, minimizing downtime.

Fans and supporters can follow Browne's progress and stay updated on upcoming events via the F2 Midget New Zealand Facebook page, as well as his personal racing page, *Tylar Browne Racing*. With half the season still ahead, there's plenty more to come from this talented driver.

As Kaeser continues to support Browne's success, the company takes pride in supplying Dracevich Panel Beaters with the Kaeser SK 22 series rotary screw compressor, ensuring the workshop runs efficiently while Browne focuses on his racing career.
