

February 2021

Kaeser becomes an associate member of the Collision Repair Association

Kaeser Compressors NZ recently became an associate member of the Collision Repair Association (CRA), and will be exhibiting at CRA's annual conference, taking place at the Marlborough Convention Centre in Blenheim from 16 to 17 April 2021.

Kaeser Compressors NZ recently joined the Collision Repair Association as an associate member. Founded over 100 years ago - and formerly known as the NZ Motor Body Builders' Assn - the Association represents the interests of all parts of the collision repair industry, from panel beating to motor body building to structural repairs and everything in between. As one of the world's largest compressed air systems providers and compressor manufacturers, Kaeser Compressors has been supplying the collision repair and wider automotive industry with compact, reliable and energy efficient compressed air system solutions for many years.

One very popular compressed air system with the collision repair industry is the Aircenter. Remaining proudly manufactured in Germany, the user-friendly Aircenter is a complete turnkey system which incorporates a Kaeser rotary screw compressor, an energy efficient refrigeration dryer and an air receiver all in one space-saving compact package. The space-saving design has long since made the Aircenter the ideal solution where space is at a premium - such as in collision repair workshops.

Peter Eckberg, Managing Director of Kaeser Compressors NZ said: 'We are delighted to now be an associate member of the CRA. As a supplier to many businesses in the collision repair industry there was a clear synergy for us in joining the association.'

Kaeser will be exhibiting at the annual CRA conference, taking place at the Marlborough Convention Centre in Blenheim from 16 to 17 April 2021. For more information on the Kaeser Aircenter or to learn more about Kaeser's stand at the 2021 Collision Repair Association annual conference, visit nz.kaeser.com or phone 0800 447 820.
